

109TH CONGRESS

H. R. 4747

To amend the Public Health Service Act to improve the prevention, diagnosis, and treatment of heart disease, stroke, and other cardiovascular diseases in women.

IN THE HOUSE OF REPRESENTATIVES

FEBRUARY 14, 2006

Mrs. CAPPS (for herself and Mrs. CUBIN) introduced the following bill; which was referred to the Committee on Energy and Commerce, and in addition to the Committee on Ways and Means, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To amend the Public Health Service Act to improve the prevention, diagnosis, and treatment of heart disease, stroke, and other cardiovascular diseases in women.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Heart Disease Edu-
5 cation, Analysis, and Research, and Treatment for Women
6 Act” or the “HEART for Women Act”.

7 **SEC. 2. FINDINGS.**

8 Congress makes the following findings:

1 (1) Heart disease, stroke, and other cardio-
2 vascular diseases are the leading cause of death
3 among women.

4 (2) Despite being the number 1 killer, only 13
5 percent of women are aware that cardiovascular dis-
6 eases, including heart disease and stroke, are their
7 greatest health risk.

8 (3) Many minority women, including African
9 American, Hispanic, and Native American women,
10 are at a higher risk of death from heart disease,
11 stroke, and other cardiovascular diseases, but they
12 are less likely to know of this risk.

13 (4) There is a pervasive lack of awareness
14 among health care providers that cardiovascular dis-
15 ease is the leading killer of women.

16 (5) Women are less likely than men to receive
17 certain treatments for cardiovascular diseases, per-
18 haps due to lack of awareness and the presence of
19 different symptoms in women than in men.

20 (6) Women tend to experience later onset of
21 heart disease than men, and therefore more often
22 suffer from multiple conditions that mask symptoms
23 of heart disease and complicate treatment.

24 (7) Certain diagnostic tests for cardiovascular
25 disease may be less accurate in women than men.

1 (8) Drug effectiveness and metabolism differ in
2 women and men, impacting successful treatment of
3 cardiovascular disease.

4 (9) In addition, stroke kills 2.3 times as many
5 females as does breast cancer. Nearly 61 percent of
6 stroke-related deaths occur in females. Studies have
7 found gender differences in the effects, diagnosis,
8 and treatment of stroke. For instance—

9 (A) stroke severity is greater in women
10 than in men;

11 (B) women often receive fewer diagnostic
12 tests and intervention procedures than men;
13 and

14 (C) strokes present treatment issues
15 unique to women.
